# Agenda

- Successful projects
- Project leadership
- Emotional and Social intelligence
- ~~Manage~~ Lead people to deliver useful projects
- Become a socially intelligent leader
- Stop managing and start leading

# Successful Projects

- What do we mean by successful projects?
- How can we tell *for sure* whether a project is successful?

# Projects – why, what, who, how?

Stakeholders

"If you can't  
make it good,  
at least make it  
look good."

# Project Management vs Project Leadership

- Project Managers should resemble **leaders** more than **administrators/managers**.

Why?

- Projects are change, not business as usual (BAU)
- BAU requires **rational** skills → **management**
- Change requires **emotional** skills → **leadership**
- To effect change, you need a team with leadership attitude

# Leadership Attitude

- To have a team with leadership attitude, you need an **inspiring** leader

# Leadership

- Leadership is **not** a business skill, it is a **life style**

Being a leader is like being a lady. If you need to explain to others that you are, then you are not.

Margaret Thatcher

# Emotional and Social Intelligence

- Studies are continually highlighting the importance of emotional and social intelligence in skills leadership

**Findings** – Emotional and social intelligence competencies are found to represent a practical and theoretically coherent, reliable and valid approach to **assessing** and **developing** individuals in diverse cultures.

Emmerling & Boyatzis (2012)
